FRENCH AIRMAN'S BOMBS FIRED POWDER FACTORY

Paris War Office Issues Official Account of Capt. Happe's Exploit.

issued in Paris. This factory is one of the most important powder-producing points in Germany. Here is the latest count of the exploit:

"One of our aviators, Capt. Happe came down to a height of only 1,500 yards above this powder factory, in order A MATTER OF RESULTS to throw his projectiles with the greatest degree of precision. He thus let fall Let us demonstrate to you the business winning power of smart Printing—the kind four melinite bombs, each measuring we are turning out every day. ninety millimeters. The first landed on an acid reservoir, and the other three on the factory itself. The projectile on the factory itself. The projectile which fell on the acid reservoir caused blue smoke to arise, which the aviator at first thought came from fire directed against himself. Soon after an immense flame shot up from this same point, along with clouds of thick smoke. The smoke reached the height of the aeroplane—that is to say, 1,500 yards.

"Capt. Happe remained for ten minutes over the powder works to observe the effects of his efforts. In this way he was able to see that beyond the fire in the factory itself, where three bombs had been thrown, the flames spread to different parts of the building as a result of the explosion of the bomb in the reservoir."

FOUR GERMAN SUBMARINES SUNK BY BRITISH NAVY

Two Others Believed to Have Been Accounted For by Merchant

LONDON, March 6 .- The sinking of the German submarine U-8, now officially announced, makes the fourth of these vessels to be sunk by British warships since the beginning of the war, the others being the U-15, the U-18 and one rammed by the destroye

It is believed that a French destroyer also sank one, and the captains of two British merchantmen are claiming the prizes offered for the first merchant captain to account for a hostile submarine.

The claim of the captain of the stear PREMEMBER. It is equipped to make Eyeglasses to order.

COAST ROUTE MAPPED OUT.

May Sail Safely Along Gulf From Secretary of Navy Will Visit San Florida Keys to the Mississippi.

It is now possible to sail safely along the Gulf of Mexico from the Florida Keys to the mouth of the Mississippi river in the smallest of boats, if direcof the coast and geodetic survey are followed closely by the intrepid sailor. especially useful, it is stated.

In an envelope at the back of the book are charts showing through routes practicable for small vessels, elucidating sailing directions. Besides the descriptions of the navigable waters of the coast, information concerning port facilities, places where supplies and fuel can be had, where repairs can be made and tides and current tables is contained in the new book. Directions are also given for navigating what is known as the "shallow route" across Florida from the Atlantic to the Gulf of Mexico.

The matter in the volume is derived from surveys and special investigations by the coast and geodetic survey and the United States Army Corps of Engineers.

The control of the first session of the last Congress.

LOT MAY BE RETURNED Japanese Say Schooner Aysha Con-

Citizens' Northwest Suburban Association Delays Action on Question, However.

Unable to obtain a branch of the Suburban Association may return to hristian Heurich a lot which he donated for that purpose. The question Britain and her allies. or disposing of the lot was brought up at a meeting last night in a resolution introduced by W. E. Osmond asking that the lot be returned to the donor, since the Commissioners and Congress had refused to sanction a branch library for Tenleytown. By some of those present it was thought that the lot was eating itself up in taxes, which it appears that the association has to pay, and that it would perhaps be better if, the lot were relinquished.

The meeting was held in Masonic Hall, in that section of the District, and was the first meeting of the association during 1915, owing to the recent illness of President Charles C. Lancaster. of disposing of the lot was brought up

Dr. J. W. Chappell, however, spoke in favor of the retention of the lot until such time as the Commissioners may be approached again upon the subject, and a resolution was passed by the association tabling the matter until the sociation tabling the matter until the next meeting, when a report will be expected by the computation of the crew were given an enthusiastic reception by Turkish troops. Dr. J. W. Chappell, however, spoke in such time as the Commissioners may be approached again upon the subject, and a resolution was passed by the association tabling the matter until the next meeting, when a report will be expected by the citizens from a committee appointed by President Lancaster to look into the matter. Dr. Chappell was appointed chairman of the committee which will lay the question before the Commissioners once more.

Dr. Chappell thought it strange that the Commissioners and Congress had failed to see the need of a library in Tenlevtown, but declared that he did not think the "hostile attitude which sometimes seems to prevail on the part of Congress toward the District will continue forever."

Firemen's Pension Favored.

A resolution unanimously indorsing the efforts of the Firemen's Association to obtain adequate pensions for local firemen was passed. A resolution, introduced by Dr. Chappell, was passed indorsing the campaign for the stringent enforcement of the laws against the sale of "dope."

Those who braved the elements last night in the interest of civic affairs touching upon the needs of their section of the District were: Charles C. Lancaster, president; Alex J. Yowell, secretary: F. J. Heider, treasurer; C. Hurley, W. E. Osmond, Dr. J. W. Chappell, J. A. Norris and Dr. A. M. Ray. to obtain adequate pensions for local

tinues Active in the Indian Ocean.

TOKIO, March 6. - The Japanese steamer Luzon Maru, which hails from Moji, reports that the schooner Aysha is still active in the Indian ocean. The crew of the Aysha feign to be Public Library, the Citizens' Northwest shipwrecked, according to the Japanese, attempting by this means to entrap steamers flying the flags of Great

sailed away. From that time their movements are in doubt.

A Manila report stated that the crew of the Aysha had captured a collier on which they mounted two Maxim guns, presumably brought from the Emden, and had been making raids on commerce. December 18, the French ministry of marine announced that the auxiliary cruiser Empress of Lance had

STREET CAR STRIKES AUTO. Three Men Slightly Injured in Mishap at 13th and F Streets.

Three men in an automobile were slightly injured last night when a car of the Washington Railway and Electric Company struck the machine at 13th and F streets northwest. Richard F. Brangle, twenty-two years

Richard F. Brangle, twenty-two years old, and Charles Clevelaux, forty years old, both of 1921 H street northwest, and Maurice Biscaye, thirty-eight years old, of 2115 Pennsylvania avenue, were the occupants of the automobile. They were taken to Emergency Hospital in the ambulance.

Policeman Owens, detailed at the hospital, was told by the injured men that the machine, which was operated by Brangle, was going south on 13th.

by Brangle, was going south on 13th street when it was struck at F street by an eastbound car.

Law Students to Debate. Representatives of the senior and unior debating societies of the Georgetown University Law School are to ebate the proposition that there should be federal compulsory arbitra-

tion of labor disputes, in the audito-

tion of labor disputes, in the auditorium of the school, this evening. The affirmative is to be upheld by R. H. Andrus of Utah and J. R. Gibson of Kentucky, while the negative is to be supported by G. Helford of Rhode Island and B. Brady of Ohio. John Mahlum, president of the Junior Debating Society, is to preside, and the judges will be members of the faculty. This is to be the second of a series of debates between seniors and juniors for prizes aggregating \$150.

Abe Martin Says:

Stew Nugent is visitin' his mother till times pick up. We're all good listeners when money talks.

Whittaker to Address Ohioans.

Whittaker to Address Ohioans.

An illustrated address by William H. Whittaker, superintendent of the workhouse, Occoquan, Va., will be the principal feature of the meeting of the Ohio Society of the District, which is to be held at Rauscher's at 8 o'clock Monday evening. Other features arranged for by the committee on entertainments are a series of vocal solos by Charles T. Tittman and an address by Dr. Harvey W. Wiley. Preceding the entertainment, which will be presided over by John Joy Edson, vice president of the society, a business meeting will be held with Justice Day, president of the organization, in the chair. An invocation will be pronounced by Rev. H. N. Couden. Following the entertainment a buffet luncheon will be served.

They tame all weather

Why be subject to the caprices of the weather? Why let your mental and physical states, as well as your earning powers, be subject to the alternating rawness, chill drafts and zero snaps, until you feel that with the shortcomings of your old fashioned heating equipment the house seems roofless? Why not make your own climate in the home, no matter how fickle or fierce the weather, by flooding the house at any moment with cozy, genial comfort at the turn of a radiator valve?

An IDEAL Boiler and AMERICAN Radiators will assist much to reduce the cost of living and better the

living by making your home a brighter, healthier, happier place in which to live. These outfits keep the house warm from eight to twenty-four hours on one charge of fuel, depending on the severity of the weather; they relieve household drudgery because requiring little attention; and they scatter no ash-dust or coal-gases into the living rooms to ruin furnishings and endanger health. Their cleanliness reduces housecleaning one-half.

IDEAL Boilers and AMERICAN Radiators actually pay for themselves in their fuel economies and absence of repairs. They are made, throughout, of high-grade iron. There is nothing to wear out, rust out or burn out. Every feature of their construction has been tested and its value and efficiency definitely established in our big Thermal Research Laboratories, here and abroad. When put in your building we know that they will get full heating value from every pound of fuel, and deliver it to you in clean, uniform, healthful warmth and comfort throughout your home. These outfits cost no more than ordinary outfits. Accept no substitute!

No one need wait to build a new home in order to be rid of the wastes and nuisances of old-fashioned heating. IDEAL Boilers and AMERICAN Radiators can be put in old buildings as well as new, large or small, farm or city. No tearing up partitions or floors, nor disturbing old heating equipment until the new is ready for use.

Our free book "Ideal Heating Investments" tells much that it will pay you to know. Start today to tame the weather by making your own inside climate, and tell us the kind and size building you wish to heat. Puts you under no obligation to buy. Act now, while iron prices are so attractive (more so than in10 years past) and you get the services of the most skillful fitters! Write, phone or call today.
